Research Scientist and **founding member of NVIDIA Research Singapore Lab**. As **Team Lead of SoL-Pi** and a **Core Contributor to the SANA and SoL series**, I study recursive self-improvement for agent harnesses and inference acceleration. Before NVIDIA, I worked at Meta on multimodal foundation models and generative AI products, and earned my Ph.D. at KAUST with **Jürgen Schmidhuber**. My experience spans **1K+ GPU pretraining**, billion-pair datasets, and **20B-parameter models**. I have co-authored **40+ research papers** with **1.8K+ citations**, received a **Best Paper Award at the NeurIPS 2023 R0-FoMo Workshop**, and led or contributed to open-source projects with a combined **10K+ GitHub stars**. The open-source models I led have **560K+ downloads on Hugging Face**.

Research Experience

NVIDIA Research, Efficient AI — Singapore
Research Scientist, working with Prof. Song Han — *2026 – present*
Founding member of NVIDIA Research Singapore Lab.

- **Team Lead of SoL-Pi.** Scale auto-research loops to discover reusable harness improvements for more token-efficient coding agents.
- **Core Contributor to SoL-Series.** Advance **RSI for Inference Acceleration** through **SoL-Engine** and **SoL-Attn**, developing agentic acceleration workflows for video generation models.
- **Core Contributor to SANA-Series.** Contribute to **SANA-WM**, **SANA-Video-2.0**, and **SANA-Streaming** across world modeling, efficient video generation, and real-time streaming.

Meta, BizAI — MPK, United States
Research Scientist Intern, with Ding Liu and Wei Liu — *2025*

- Co-developed a commercial **7B text-to-image model**, trained on over **1B image–text pairs** and deployed in production.
- Built a **20B native LLM-driven multimodal generation prototype** from scratch.
- Contributed to models for unified visual understanding and generation, and to the **Neural Computers** project.

Meta, MGenAI — London, United Kingdom
Research Scientist Intern, with Juan-Manuel Pérez-Rúa and Tao Xiang — *2024*

- Co-developed a text-to-image foundation model supporting widely used products.
- Scaled autoregressive diffusion for video generation through **MarDini**.

KAUST, AI Initiative — Saudi Arabia
Ph.D. Researcher, advised by Prof. Jürgen Schmidhuber — *2022 – 2026*

- Studied multi-step inference in diffusion models, autoregressive models, and reinforcement learning agents.
- Developed **T-GATE** attention caching, merged into Hugging Face Diffusers, and co-developed **NLSOM** for collective intelligence among agents.

Tencent, Jarvis Lab — Shenzhen, China
Research Intern, with N. He, Y. Li, and Y. Zheng — *2021 – 2022*

- Conducted research on generative models and medical imaging.

Research Mentorship

Tian Ye (Ph.D. candidate at HKUST; co-mentored with Dr. Enze Xie and Duomin Wang)
Research topics: Recursive self-improvement, efficient agent harnesses (SoL-Pi), and efficient video generation.

Haoyi Zhu (Ph.D. student at USTC; co-mentored with Dr. Enze Xie)
Research topics: World models and controllable video generation (SANA-WM).

Qihang Cao (Ph.D. student at NTU)
Research topics: Automated research and coding-agent harness efficiency (SoL-Pi).

Sensen Gao (Ph.D. student at NTU)
Research topics: Automated research and coding-agent harness efficiency (SoL-Pi).

Yitong Li (Ph.D. student at University of Hong Kong; co-mentored with Dr. Enze Xie)
Research topics: Model inference acceleration and agent harnesses (SoL-Engine, SoL-Pi).

Lei Zhang (Ph.D. student at UC San Diego; co-mentored with Dr. Hanrong Ye)
